***Reason for Allowance***

1. Claims 1-14 are allowed for the following reasons:

The instant application is deemed to be directed to a nonobvious improvement over the invention patented in Pat. No. Arai et al. (US 5,150,280).

Claim 1 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious an end portion of the second conductor layer is in direct contact with the first insulating layer to constitute bonding portion to be connected to a lead wire in combination with the rest of the limitations of the base claim. Claims 2-14 depend on claim 1 and therefore they are also allowed. Although the prior art teaches consecutively/alternating layers of insulating and conductive layers, nonetheless, it fails to teach an end portion of the second conductor layer is in direct contact with the first insulating layer to constitute bonding portion to be connected to a lead wire in combination with the rest of the limitations of the base claim. The lead wire is a single wire that efficiently and compactly couples various optical components on a silicon substrate, as shown in at least fig. 9, compared to prior art references with multiple wire connections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2883

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Citation of Relevant Prior Art***

2. Prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In accordance with MPEP 707.05 the following references are pertinent in rejection of this application since they provide substantially the same information disclosure as this patent does. These references are:

Kim 6459154

Shakuda 5557115

These references are cited herein to show the relevance of the apparatus/methods taught within these references as prior art.
